PROFESSIONAL SUMMARY

Experienced cybersecurity practitioner and CQI & IRCA Certified ISO/IEC 27001:2022 ISMS Lead Auditor specializing in Governance, Risk, and Compliance (GRC). Proficient in executing ISO 27001 and NIST 800-53 audits across enterprise environments, developing internal security policies, managing Active Directory (AD DS), and conducting phishing simulation campaigns. Demonstrated track record of reducing critical compliance gaps by 30% and organizational risk by 35% through structured audit programs, risk assessments, and security awareness initiatives.

TECHNICAL SKILLS

- **GRC & Compliance:** ISO 27001:2022 Lead Auditor, ISO 27001 ISMS, NIST SP 800-53, SOC 2, Risk Assessment, Internal Audit, Policy Development, Access Control Policy, AD DS Policy Management.
- **Security Tools:** Vanta, Microsoft Active Directory, Windows Group Policy (GPO), Nessus, Nmap, OpenVAS, Microsoft Sentinel, Defender for Endpoint, Office 365 Security & Compliance, Metasploit, Autopsy, Kibana.
- **Development & Other:** OWASP Top 10, KQL (Kusto Query Language), HTML/CSS, HTTPS/CSP Hardening.

PROFESSIONAL EXPERIENCE

Warren & Carter Technologies – Cyber Security Auditor Nacogdoches, USA

April 2026 – Present

- Drafted 8+ NIST/ISO-aligned security and vendor risk policies, improving internal compliance by 35% and ensuring 100% data privacy adherence across the organization.
- Conducted routine system and IAM access audits across infrastructure, remediating 90% of high-risk vulnerabilities and reducing over-privileged accounts by 45%.
- Executed targeted phishing simulations and ISO 27001 readiness audits, dropping the team's click-through rate from 25% to 0% and closing 10+ compliance gaps.

Etech Global Services – Cyber Security Auditor Nacogdoches, USA

May 2025 – Feb 2026

- Drafted 8+ NIST/ISO-aligned security and vendor risk policies, improving internal compliance by 35% and ensuring 100% data privacy adherence across the organization.
- Conducted routine system and IAM access audits across infrastructure, remediating 90% of high-risk vulnerabilities and reducing over-privileged accounts by 45%.
- Executed targeted phishing simulations and ISO 27001 readiness audits, dropping the team's click-through rate from 25% to 0% and closing 10+ compliance gaps.

Etech Global Services – Cyber Security Auditor – Intern Nacogdoches, USA

Feb 2025 - May 2025

- Completed extensive endpoint and system audits, identifying and correcting misconfigured assets to ensure regulatory compliance.
- Investigated system vulnerability by using active scans with Nmap, Nessus, and Metasploit penetration tools.
- Improved quality in technical documentation and the delivery of milestone schedules, useful for conducting internal risk assessment and policy review for senior management staff.

Stephen F Austin State University – Graduate Teaching Assistant Nacogdoches, USA

Jan 2024 – Dec 2024

- **Fundamental Instruction:** Taught basic concepts in cybersecurity to undergraduate students, such as the CIA triad, network security, and secure architecture.

- Web Development: Taught the fundamental concepts of front-end development using HTML, CSS, and conventional web design principles.
- Academic Operations: Supervised lab sessions, monitored examinations, and evaluated technical assignments and research projects to ensure accurate grading.

Hypotenuse Corporation Pvt Ltd – Sr. Frontend Developer

July 2020 – Dec 2022

Mumbai, India

- Developed secure, high-performance web applications, improving load times by ~40%.
- Implemented secure coding practices aligned with OWASP Top 10, reducing XSS and CSRF risks.
- Collaborated with cross-functional teams to deliver scalable, security-focused web solutions.

Digipanda Consulting Pvt. Ltd – Web Developer

Oct 2019 – June 2020

Mumbai, India

- Applied OWASP-aligned secure coding standards to web interfaces.
- Hardened web applications using HTTPS, secure headers, and content security policies (CSP).
- Identified and patched access control and input validation vulnerabilities.

Vanzer Technologies – Jr. Web Developer

Aug 2018 – Sept 2019

Chandigarh, India

- Improved website performance, SEO practices, and secure UI implementations.
- Supported milestone delivery and technical documentation.

PROJECTS

Novapay Fintech ISO 27001 | ISMS Implementation

Working

- Designed and deployed a complete ISO/IEC 27001:2022 ISMS for a simulated FinTech company covering all 10 clauses and Annex A controls
- Configured Windows Server 2025 as Domain Controller (novapay.local) — implemented AD DS with OUs, department-based RBAC groups, and domain-joined workstations
- Created and linked 6 GPOs: baseline security policy, password policy (12-char/90-day), account lockout (3 attempts/30-min), USB controls, and department-specific endpoint restrictions
- Deployed auditd on Ubuntu Server 22.04 with custom audit rules — captured and analyzed failed SSH login attempts, successful logins, sudo usage, and file access events
- Authored ISO 27001-aligned policy documents: Information Security Policy, ISMS Scope, Access Control Policy, and Audit Log & Monitoring Policy all with evidence references

Linux Honeypot Server (Cowrie)

- Deployed Cowrie honeypot on Ubuntu to monitor unauthorized SSH activity.
- Logged attacker behavior and visualized attack patterns using Kibana dashboards.

Firewall Evasion Analysis using CTI

- Simulated firewall bypass techniques such as DNS tunneling and port knocking.
- Identified security gaps and documented mitigation recommendations.

USB Forensics Investigation

- Investigated USB-based data exfiltration scenarios using Autopsy and Kali Linux.
- Analyzed file artifacts and timelines to determine attack methods.

EDUCATION & CERTIFICATION

- CQI & IRCA Certified ISO/IEC 27001:2022 Lead Auditor — BSI Training Academy | Feb 2026 | Cert #ENR-01916942.
- MS in Cybersecurity – Stephen F. Austin State University, USA (Dec 2024).
- Fortinet Certified Associate – Cybersecurity (Jun 2025).
