

SIDHARATH SHARMA

GRC Analyst | ISO 27001 Lead Auditor | Governance, Risk & Compliance

(425) 287-9980 | Sidharathsharmainfo@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

GRC Analyst with hands-on experience running governance, risk, and compliance programs across ISO 27001:2022 and NIST 800-53 frameworks. CQI & IRCA Certified ISO/IEC 27001:2022 Lead Auditor skilled in building and maintaining risk registers, testing internal controls, tracking remediation to closure, and translating technical findings into business-ready reporting for leadership and auditors. Across roles as a Cyber Security Auditor, contributed to 5+ security policy drafts, led or supported 13 internal audits, assessed 50+ systems for compliance and access-control gaps, and helped close 80+ audit findings.

CORE GRC COMPETENCIES

- Governance: Policy development & lifecycle management, control framework alignment (ISO 27001:2022, NIST 800-53, SOC 2), security governance documentation.
- Risk Management: Risk register maintenance, risk assessments & scoring, third-party/vendor risk reviews, risk treatment planning.
- Compliance: Control testing, audit evidence collection, gap analysis, remediation tracking, ISO 27001 readiness audits, IAM/access control audits.
- Tools & Platforms: Vanta, Microsoft Active Directory & GPO, Nessus, Nmap, OpenVAS, Microsoft Sentinel, Defender for Endpoint, KQL, Office 365 Security & Compliance.

PROFESSIONAL EXPERIENCE

Warren & Carter Technologies – Cyber Security Auditor (GRC Analyst)

April 2026 – Present

Nacogdoches, USA

- Own and maintain a risk register spanning 5 security and vendor risk policies, mapping controls to NIST and ISO 27001 requirements to strengthen internal governance.
- Conducted 13 internal audits across infrastructure, assessing 50 systems as part of ongoing risk assessments and IAM access reviews.
- Led ISO 27001 readiness audits and control-effectiveness testing, including phishing simulation exercises, closing 80+ findings and tracking remediation through to management reporting.

Etech Global Services – Cyber Security Auditor

May 2025 – Feb 2026

Nacogdoches, USA

- Drafted 2 NIST/ISO-aligned governance and vendor risk policy proposals, supporting consistent data privacy adherence across the organization.
- Conducted internal audits across 7 departments, assessing 35 systems for access control and IAM compliance.
- Ran phishing simulation control tests and ISO 27001 readiness audits, closing 70+ findings across assessed systems.

Etech Global Services – Cyber Security Auditor – Intern

Feb 2025 – May 2025

Nacogdoches, USA

- Completed endpoint and system audits, identifying misconfigured assets and tracking remediation to ensure regulatory compliance.
- Assessed system vulnerabilities using Nmap, Nessus, and Metasploit to support risk assessment reporting.
- Produced audit documentation and risk assessment reports for senior management review.

Stephen F Austin State University – Graduate Teaching Assistant

Jan 2024 – Dec 2024

Nacogdoches, USA

- Taught foundational cybersecurity and governance concepts (CIA triad, network security, secure architecture) to undergraduate students.
- Taught front-end development fundamentals using HTML, CSS, and standard web design principles.
- Supervised lab sessions and evaluated technical assignments, ensuring accurate and consistent grading.

Hypotenuse Corporation Pvt Ltd – Sr. Frontend Developer

July 2020 – Dec 2022

Mumbai, India

- Developed secure, high-performance web applications, meaningfully improving page load times.
- Implemented secure coding practices aligned with OWASP Top 10, reducing XSS and CSRF risk exposure.

- Collaborated cross-functionally to deliver scalable, security- and compliance-conscious web solutions.

PROJECTS

- Novapay Fintech ISO 27001 ISMS Implementation — Designed and governed a complete ISO/IEC 27001:2022 ISMS (all 10 clauses, Annex A controls) for a simulated FinTech company, including risk assessment, access control policy, and audit/monitoring policy documentation with evidence references.
- Linux Honeypot Server (Cowrie) — Deployed Cowrie honeypot on Ubuntu to monitor unauthorized SSH activity; visualized attack patterns using Kibana dashboards for risk reporting.
- USB Forensics Investigation — Investigated USB-based data exfiltration scenarios using Autopsy and Kali Linux, analyzing artifacts to support incident risk assessment.
- Firewall Evasion Analysis using CTI — Simulated firewall bypass techniques (DNS tunneling, port knocking) to assess control gaps, documenting risk findings and mitigation recommendations.

EDUCATION & CERTIFICATIONS

- CQI & IRCA Certified ISO/IEC 27001:2022 Lead Auditor — BSI Training Academy | Feb 2026 | Cert #ENR-01916942
- M.S. in Cybersecurity — Stephen F. Austin State University, USA | Dec 2024
- Fortinet Certified Associate – Cybersecurity | Jun 2025
